***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a Phospholipase A2 [SEQ ID NO: 30].

Group II, claim(s) 4-11, drawn to DNA encoding Phospholipase A2 having the sequence of SEQ ID NO : 29, vector, host cell and method of making the enzyme.

Group III, claim(s) 12-15, drawn to antibody to Phospholipase A2 [SEQ ID NO: 30].

Group IV, claim(s) 16-18, drawn to a Phospholipase A2 [SEQ ID NO : 30] inhibitor screening method and a composition comprising the inhibitor.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The special technical feature of Group II is the nucleic acid (SEQ ID NO : 29), which are not shared by Groups I or III or IV. The special technical feature of Group I is Phospholipase A2 or the polypeptide sequence of SEQ ID NO : 30, which are not shared by Groups II or III or IV. The DNA of group II is related to the protein of group I by virtue of the fact that the DNA codes for the protein. The DNA molecule has utility for

the recombinant production of the protein in a host cell. Although the DNA and the protein are related, since the DNA encodes the specifically claimed protein, they are distinct inventions because the protein product can be made by other and materially distinct processes, such as purification from the natural source.

The special technical feature of Group III is the antibody, which is not shared by Groups I or II or IV, because the antibodies do not have any of the features of the polypeptides. Instead, they are spuriously related like a ligand and the corresponding receptor where the features of the ligand per se are not related to the features of the receptor.

The special technical feature of Group IV is the inhibitor compound obtained by the method of screening the inhibitor, which is not shared by Groups I or II or III, because the protein and the inhibitor compound are structurally unrelated, and that the compound can be obtained by using the enzyme isolated or purified from natural sources.

Since Groups I-IV do not share a corresponding special technical feature, they are not so linked as to form a single inventive concept under PCT Rule 13.1.

4. A telephone call was made not made to request an oral election.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

#### **6. *Rejoinder***

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is

subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tekchand Saidha whose telephone number is (571) 272 0940. The examiner can normally be reached on 8.30 am - 5.00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy can be reached on (571) 272 0928. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
